FIRE PROTECTION DISTRICT

Genesee Fire Rescue's New Website

www.geneseefire.org

Genesee Fire Rescue (GFR) received a grant from the Statewide Internet Portal Authority (SIPA) to fully fund the development of a new website.

This initiative was timed to coincide with our Community Wildfire Protection Plan (CWPP) update so that as residents looked to stay up to date on this project, they would also find a plethora of in-depth information and opportunities. A few key highlights:

- **Public Education:** Along with information on our CWPP update a treasure trove of information on house fire safety, wildfire risk reduction, and emergency preparedness
- **About Us:** Information about staff, volunteers, and board members that serve your community.
- **Community Outreach: "Adopt A Hydrant" – This is a new initiative for 2020 to engage our community and to provide better access to fire hydrants during emergencies. We challenge our residents to use the interactive map to identify a hydrant near your home or business and commit to keeping it clear of weeds, grass, and snow throughout the year.**
- **Volunteer Now:** A quick fillable form that connects you with a recruiter so that you can learn more about what volunteering as a firefighter is all about.
- **Contact Us:** Tools to connect you with us on topics such as station tours, fire engine visits, open records requests, or to report code and/or safety concerns.

We hope that you will explore our new site and that it is a benefit to you and yours.

Stay safe,

Genesee Fire Rescue
